

Anyone, even those who “never get sick,” may need help at times.

Perhaps you or a loved one needs only a small amount of assistance, such as help with meals, errands, or shopping. It may be that you need more help getting dressed or taking a bath. Your family and friends want to help, but may not always be available. Where do you turn to get the kind of help you need?

Intervention Associates can help.

Since 1986, Intervention Associates has been providing families in the Philadelphia five-county area with direction through the health care maze while caring for their loved ones. Intervention Associates is a care management and home health company owned by The Friends Life Care at Home System.

The Friends Life Care at Home® System is a unique, nonprofit organization that bases its operations on the values and traditions of the Religious Society of Friends, also known as the Quakers. Quality, integrity, and respect for the individual are but a few hallmarks of the mission. In addition to its nonprofit subsidiary, Intervention Associates, The Friends Life Care at Home® System operates continuing-care-at-home plans in the greater Mid-Atlantic region.

When you need help for a loved one with special needs

Intervention Associates gives you *a lot less* to worry about.

Intervention Associates' Care Management Services Provide:

- * Professional assessment of your family's needs, followed by an effective plan of care to help your loved one maintain independence, function, and quality of life.
- * An effective plan to help you find the most appropriate links to community and private resources, including home-delivered meals, transportation, and other services for the homebound or aging.
- * Patient advocacy services, from inpatient admission through discharge, when leaving a hospital or medical facility.

- * Referral services to appropriate care providers such as physicians, adult day care programs, or rehabilitation centers.
- * Assistance in the selection of a senior care facility or in the actual move.
- * Evaluation of services within the home, hospital, assisted living facility, or nursing home, for appropriateness and quality.
- * Bill Paying: Our skilled accounts payable staff provides bill-paying services for our clients, either in our offices or in the home. We will assist clients with ensuring that bills are paid in a timely manner and will help with basic banking and money management needs.

Our Home Health & Support Services Include:

- * Home Health Aides: to assist you with eating, bathing, dressing, grooming, and getting in and out of bed.
- * Homemakers: to help with meal preparation and light housekeeping.
- * As an added safety measure, we also offer LifeFone, an easy-to-use, personal emergency response system with 24-hour monitoring.

Our Home Health Aides are our own employees.

With Intervention Associates, you don't have to worry about who is coming into the home, whether or not they're qualified or if they'll be reliable. We pre-screen, train, monitor, and supervise all personnel, and each is insured and bonded.

Intervention Associates stands ready to help. Our home health aides are qualified to provide the kind of compassionate care your loved one deserves.
